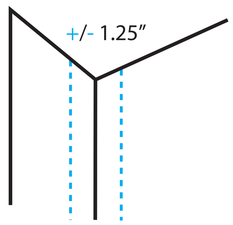
Non Sewn On End Caps

Fabric stretch and shrink requires that a design with a graphic, image or text that continues onto the end caps have a tolerance of +/- 1.25" from the corner. This means the design may move +/- 1.25" from the corner, rather then stopping right at the corner.



Sewn On End Caps

If the end cap design is different from the front panel design (graphic, image or text on the front does not continue onto the end caps,) the tolerance is +/- .5" from the corner.
